How this list was made. Each warehouse was checked on its own website in October 2026: where its warehouses are, what it says it handles, and how to reach it. A listing is not a recommendation, and no warehouse paid to be listed.

This is not every 3PL in the United States. There are thousands. These 131 are ones that ship online orders and that we could confirm from their own websites.

Prices, minimums and services change. Confirm everything with the warehouse in writing. The 3PL Intro Email asks the right questions for you.
